

Get better results from AI, every time.

Most people type a question into an AI assistant, get a generic answer, and give up. The difference between a mediocre answer and a brilliant one is often the prompt: the context, constraints, examples, and goals you give the model.

Prompt Engineering Mastery takes you step by step from your very first prompt to the techniques professionals use to build AI products and agents. No technical background required.

Inside you will learn:

- The six-part blueprint for writing any prompt
- Few-shot, chain-of-thought, and reflection techniques
- How to prompt the leading AI chatbots and open models
- Prompting for coding assistants and AI image, video, and music tools
- Playbooks for doctors, engineers, sales, parents, lawyers, musicians, and more
- System prompts, RAG, tool use, and custom agent design
- Connecting AI to your browser, files, and apps with MCP
- How to test prompts and defend against prompt injection
- 50 ready-to-use prompt templates
